

Why Saratoga 1777?

Some of you have asked why the phone lists and neighborhood voter lists keep coming from the email Saratoga1777.

In a few sentences here's why.

The battle of Saratoga was won in large part because the freeman, and as the red coats would say "the peasants", showed up. The forces of the crown did not face a Colonial army of less than ten thousand, they faced an army that grew to TWENTY thousand in a matter of days! It was tens of thousands of people who left their homes from all over the northeast and showed up for the fight.

A fight they won and it was a pivot point in the struggle for freedom.

And again on the northern frontier of New York State the battle against tyranny is being waged again.

The Democrat party is no different than the red coats of old. They believe in the right of the state to rule over the people. Right and wrong are determined by what is best in their mind for the state. They hold to an aristocracy of political and educational elites. And the people should be thankful that the government is there to manage their lives.

The Republican party candidate in this race is a "Tory." Though Freeborn and called American, she has the same belief structure as the Democrat red coats, the state is the answer.

And then there is the "rabble" -- that would be us. We are showing up to support a candidate (in this case Doug Hoffman) that truly supports the principles and values that our brethren of old embraced.

Folks we are here to win. And in winning change the course of our nation.

If enough of us show up, future generations may look back and say, "Once again the turning point of the struggle for freedom was won by the 'rabble' on the northern frontiers of New York."

For Freedom!
