Subj: VA Trojan Horse Settlement

Fellow Veterans and Friends of Veterans:

Do not be deceived by a U.S. federal government "settlement" when it involves Native American Indians or Military Veterans.

Beware of a "Trojan Horse" settlement where the VA will offer a master plan that looks great in appearance but will infiltrate and take over with more of the same illegal use under a different name.

Look no further than "*a master land-use plan for the campus that identifies sites for housing homeless veterans.*"

Huh? "identifies sites for housing homeless veterans" ?

Whoa! The entire "site" was exclusively deeded in 1888 to permanently house and care for disabled and homeless Veterans.

Congressman Ted Lieu recently met with three members of Veterans Park Conservancy, all non-Veterans representing a community homeowner group that has an illegal sharing agreement and a court order to stop construction of a sham amphitheater, but he has refused to meet with bona fide Veterans.

Sadly, he's already proving to be nothing more than an extension of the disgraced Henry Waxman who kowtowed to the "wants" of the wealth and power instead of solely looking out for the "needs" of disabled and impoverished Veterans.

Last night Bobby Shriver tweeted: "*Important news for homelessness in Los Angeles coming tomorrow. Great new Veteran Administration leadership! And community engagement.*"

There you have it ... non-Veteran Shriver has already professed "community engagement" but no mention of bona fide Veterans being invited to the table

In Truth, the only bona fide "community engagement" was confirmed on January 3, when Rafer Johnson spoke before the Los Angeles Neighborhood Council Coalition (LANCC) and declared LA to be in a "state of emergency" for homeless Veterans and challenged the City to unify with VA and open a crisis humanitarian relief project on VA property.

LANCC, consists of 96 neighborhood councils throughout LA and they passed a Motion supporting Rafer's challenge and was unanimously approved.

American Icon Rafer Johnson and Neighborhood Councils Challenge City Hall to End Veteran Homelessness in LA. (LA City Watch) <http://www.citywatchla.com/lead-stories-hidden/8152-american-icon-rafer-johnson-and-neighborhood-councils-challenge-city-hall-to-end-veteran-homelessness-in-la> .

Will Rafer and the leaders of LANCC have a place at the settlement table and does the settlement include declaring Los Angeles to be in a state of emergency and will Mayor Garcetti unify with the VA and open a crisis humanitarian relief project on VA property?

In addition, the Los Angeles County Board of Supervisors voted 5-0 in support of the Federal Judgment and this body represents approximately 10,000,000 residents in LA County, so all of this far supercedes any notion of Bobby Shriver trying to bring the neighboring community as a voice for the community-at-large. (see attached Petition to the VA Congressional Oversight Committee that lists the far-reaching support of Enforcing the Federal Judgment.

Rest assured the purported U.S. government settlement is nothing more than a Trojan Horse to deceive and defraud Veterans while continuing to benefit the wealthy and special interest groups by warehousing war-injured and impoverished Veterans in slum neighborhoods far away from the VA property that was exclusively deeded in their behalf.

Lest we forget, there would be no ACLU lawsuit or purported settlement if the Old Veterans Guard (OVG) had not hung the American Flag in distress and ACLU attorney, Peter Eliasberg, answered our call and stood up in our behalf after the VA police issued six false arrest citations and physically removed our American Flag from the front gate of the National Veterans Home. Moreover, it was the OVG that recommended and arranged to have Vietnam Veterans of America as a major Plaintiff in the second ACLU lawsuit -- both lawsuits produced Federal Judgments against former West LA VA executive director Donna Beiter who recently retired.

At the same time that Peter Eliasberg was representing us against the VA, Mark Rosenbaum of the ACLU had filed a lawsuit against the City of Santa Monica when Bobby Shriver was Mayor -- for the mistreatment of homeless -

- and now Mr. Shriver is thumping his chest about how he and the "community" will be engaged at the settlement table of the National Veterans Home.

So where's the presence and voice of the OVG at today's so-called settlement press conference with Secretary McDonald, who refused to meet with Rafer Johnson and the OVG.

As always, the Old Veterans Guard remains the constant voice of truth, reason and compassion and we hereby submit our "Veterans Home Settlement Accord" that is attached, along with our "Reparations Demand List" against Veterans Park Conservancy.

Fellow OVG member Roy Crummer sent a reminder quote from "Iron Lady" Margaret Thatcher: "*Now's not the time to go wobbly.*"

Yes ... now the real battle begins!

Join us the Sunday for our 358th consecutive Rally to "Save Our Veterans Land" and to "Bring Our Homeless Veterans HOME."
